Introduction

The Cost-of-Living Squeeze

Behind the numbers is a quiet crisis: everyday survival has become an uphill battle of juggling expenses and debt.

69.9%
worried about cost of living

63.8%
income does not cover expenses

43.1%
worried about debt

Source: NSO survey of 6,000 Thai adults, Jan 2026.

Problem

Managing scattered debts, loans, and bills across multiple disconnected institutions creates a daily cycle of financial chaos and confusion.

Solution

Unified debt intelligence as a B2C SaaS

Unified Sync

Connected Accounts

Bring all your scattered credit cards, personal loans, and recurring bills together into a single, real-time dashboard.

Intelligent Insights

Automated Optimization

Instantly analyzes high-interest traps and calculates the optimal repayment strategy (like Avalanche or Snowball).

Actionable Roadmap

Guided Execution

Clear, step-by-step milestones that protect your essentials and keep you completely on track.

Solution

We have already built a prototype with AI-driven debt intelligence. We call it “DebtWise”.

01 Connect Accounts:
Sync credit cards, loans, and bills into one hub.

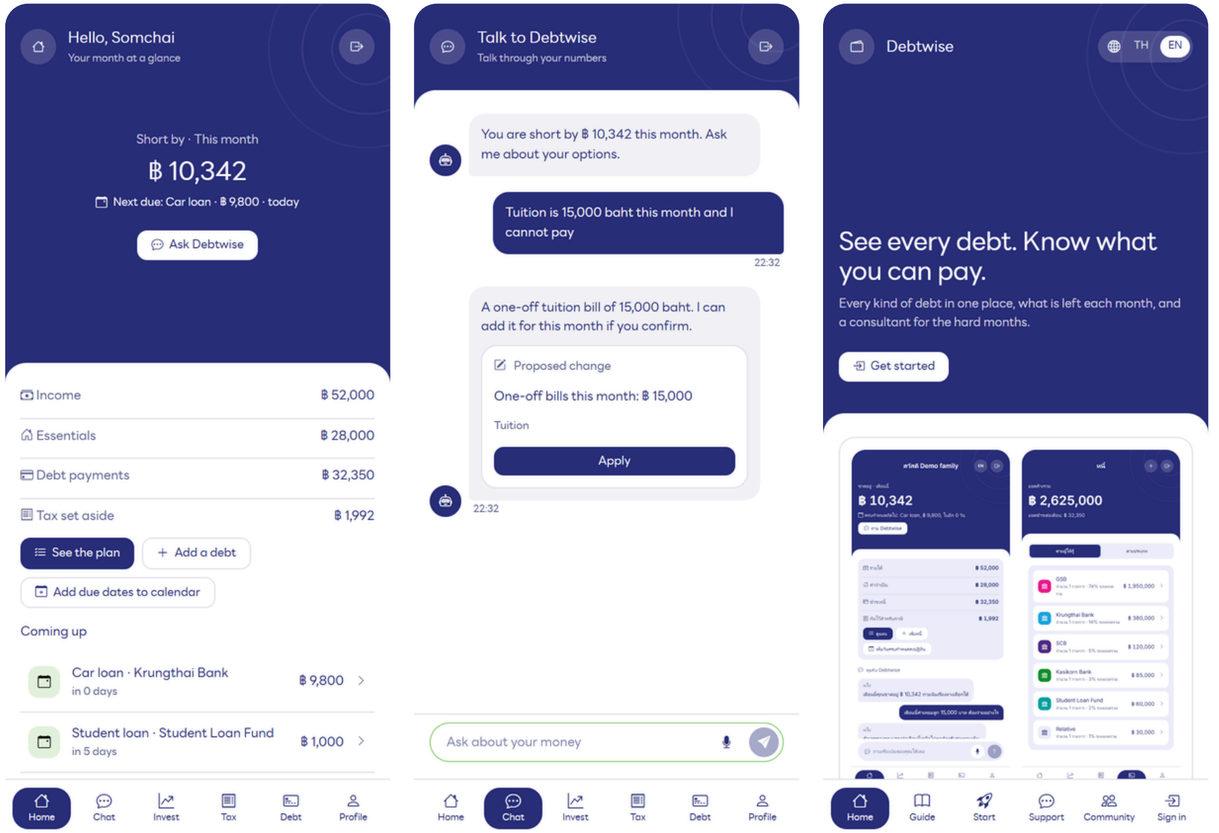

02 Automated Analysis:
AI detects high-interest traps and leaks.

03 Optimal Repayment Strategy:
Calculates the fastest payoff order (Avalanche/Snowball).

04 Essentials & Tax Protection:
Automatically rings fence survival funds.

05 Core Technology Execution:
Real-time tracking and adaptive milestones.

06 Actionable Dashboard Ready:
Clear roadmap for your daily finances.

Expanding Total Aviable Market

$0.5B

Yearly revenue if every Thai with debt paid ฿69+a month (21M people x ฿69 x 12 = ฿17.4B)

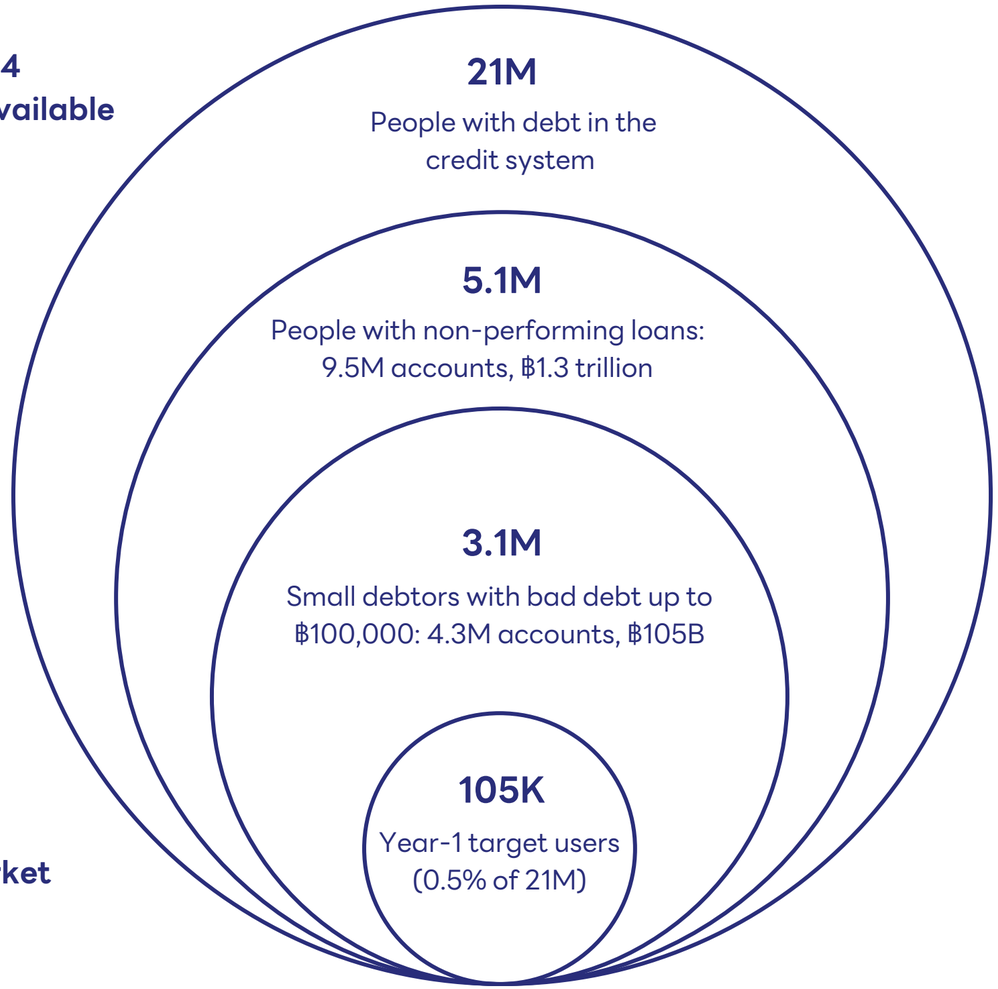

$34B

Interest Thai households pay each year on their debt. Better decisions on 1% of it are worth about $0.3B

$491B

Total Thai household debt, ฿16.4 trillion (86.7% of GDP)

Market size deep dive, borrowers

105K MAU

Usage, year 1

Goal is 0.5% of the 21M Thais with debt 1% of active users pay, about 755 paying members on average. Users grow 15% in year 2 and 10% in year 3.

$1.7M / year

Revenue

฿0.58M from ฿0.69 a month membership plus ฿1.13M bank success fee (1% of money the bank actually receives) Grows to ฿4.0M by year3.

Competition

plan build around your own situation

Threat Assesment: Low Medium High

Quadrant2:
people who look at your case:
personal, but show and gated

Quadrant1:
personal and instant, if the
numbers are right

SAM Debt Clinic and BOT
real relief, but gated and slow

DebtWise
checked numbers and a monthly plan
but 3 of 5 features still shallow

Chat GPT / Gemini
free and instant, numbers not verified

Refinn
real home loan offers, status unknown

Easy to reach and fast

Cleo, Rocket Money, YNAB
not built for Thailand

NCB bureau OK
shows your loans, no plan

Thai bank apps
your own accounts and loans only

Undebt.it
you type every number

RD Smart tax
tax only, files the return

Quadrant3:
Manual tools and reports: you
read and calculate it yourself

Quadrant4:
Fast but narrow:
one task, or your own bank only

Competitive Advantage - Research

Checked numbers, not guessed ones.
The AI explains, the code calculates.

- Instead of a chatbot writing the numbers, code computes every figure and the AI only explains it in Thai or English.
- Novel pipeline, three parts:
  - Read your case: a statement, photo or typed numbers become debts, each with a source line.
  - Calculate in code: plan, refinance and 2568 tax come from fixed rules, not the model.
  - Check before you see it: a guard blocks invented numbers, and personal details are masked first.
- Thai rules built in, with sources: 7 BOT relief measures and 2568 tax allowances, each with a link and date.
- Reliable and low cost: Gemini with a Groq backup, so one outage doesn't stop the app.

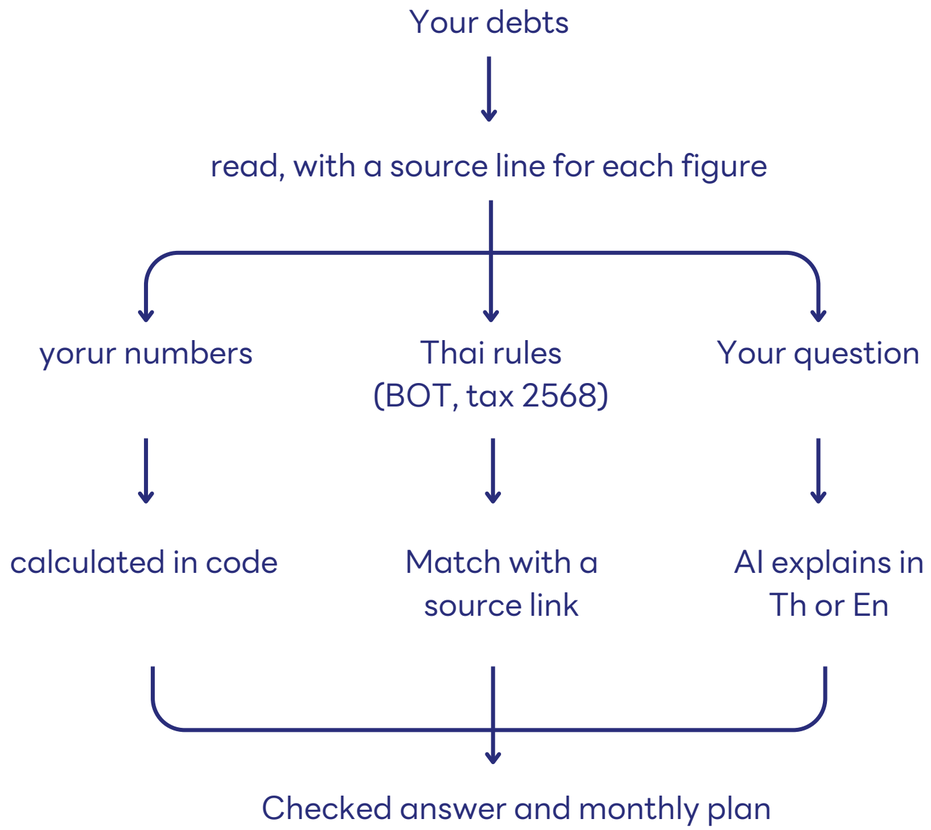

Figure guard blocks any mumber the AI made up. Personal details are masked first.

Ecosystem

DebtWise Possible Connector

Payment partner

Pay a minimum or an extra amount from the plan, in one tap.

Revenue Department

Pre-fill tax allowances and set tax aside in the monthly plan.

ElevenLabs voice

Talk to the consultant in Thai or English, hands-free.

Banks

Pull balances, rates and due dates, so you don't type them.

Tokenomist data

Token unlock dates and supply for the Invest page, so you see risk before you buy.

BOT Your Data

Share your own bank data under BOT's data-sharing rules, with your consent.

Credit bureau

See every loan across lenders and check the numbers you entered.

U Bot reminders

Due-date and plan reminders in chat, before a payment is missed.

Usage & Feedback of U-Bot

Planning

- Turn the idea into a feature list: “List the screens a debt and tax planning web app needs for a 3-minute demo.”
- Make user flows: “Write the steps a user takes from uploading a loan statement to seeing a repayment plan.”
- Cut scope: “We have 24 hours and 4 people. Which features should we drop?”

Pitching Preparation

- Practise judge questions: “Ask me 10 hard questions a bank judge would ask about DebtWise.”
- Shorten the slide text: “Make this under 15 words.”

User Testing

- Role-play as a user: “Pretend you’re a 45-year-old Thai mother with 3 loans. Use my app’s chat and tell me what’s confusing.”
- Find holes: “What will judges criticise about this feature?”
